## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 43-53, drawn to a method of assembling a contactor , classified in class 29, subclass 876.
- II. Claims 54-57, drawn to a method of fabricating a contactor, classified in class 29, subclass 593.
- III. Claim 58 , drawn to a method of repairing a contactor, classified in class 29, subclass 402.03.

The inventions are distinct, each from the other because of the following reasons:

Group I, II and III are held to be independent and distinct. In fact it is held that these Groups are unrelated. What common thread united these 3 groups?

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches for the 3 Groups are divergent..

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3729

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
